Letter Of Recommendation

It gives me pleasure to recommend Chaitanya Rajesh Banala for graduate studies at your esteemed university. I have known him in his final semester of his undergraduate course at IIT Bombay. He was one of the top students in my class.

Chaitanya has been consistent in his academics, maintaining his academic performance throughout the eight semesters. He is a very sincere and diligent student with sufficient motivation to excel in his chosen field of studies.

In the Mobile Computing course I taught, he has shown exemplary performance in his examinations and the course project. His project involved developing an Android Application and a Backend server that employs MarkerLess Augmented Reality technology. The project reflects his adeptness to learn new technologies quickly and finish them ahead of the deadlines. The core project idea is also innovative and shows his ability to think non-conventionally.

Looking at his journey, with two years of industrial experience and now joining a research lab and researching in his field of interest, he appears passionate and motivated. Also, taking into account the range of courses and projects he has undertaken in the field of AI, one can see his urge to understand concepts beyond the theoretical purview, reflecting his research potential.

Besides academics, Chaitanya has also exhibited leadership qualities during his interactions with me. He has a very positive outlook making him approachable and easy to communicate with him.

I agree with his decision to pursue graduate studies and strongly recommend him for admission and a suitable financial assistantship at your university.
