Letter Of Recommendation

I would like to recommend Mr Chaitanya Rajesh Banala for graduate studies at your esteemed university. He was one of the top students in my course taught at IIT Bombay.

Chaitanya is a very sincere, hard working and diligent student with sufficient motivation to excel in his chosen field of studies. He has been consistent in his academics, maintaining his academic performance throughout the eight semesters.

In the Mobile Computing course I taught, he has shown exemplary performance in his examinations as well as the course project. His project involved developing an Android Application that uses MarkerLess Augmented Reality technology. The project reflects his adeptness to learn new technologies at a fast pace and finish implementing them before the deadlines. The project idea at the core is innovative and shows his ability to think from a non-conventional point of view.

Looking at his journey, with two years of industrial experience and now joining a research lab and researching in his field of interest, he appears passionate and motivated. Also, taking into account the range of courses he has undertaken, related to the field of AI, one can see his urge to understand concepts beyond the theoretical purview, reflecting his research potential.

Besides academics, Chaitanya is also good at organizational skills and has exhibited leadership qualities. He has a very amiable disposition, making him approachable and easy to communicate.

I agree with his decisions to pursue graduate studies and strongly recommend him for admission and suitable financial assistantship at your university.
